FROM RECEPTION DESK TO DIAGNOSTIC LAB...

Whether an existing health care facility or new, we can help you achieve and maintain a wayfinding system that is both professional and dynamic.

Our experience goes back to 1987 and includes hospitals, medical clinics, extended care residences and specialty health care facilities among others. We will work with your design / architect team or provide options from our own in-house design staff. And as always, we will meet your requirements for budget, quality, creativity and timeline.
